

Letter of Volatility

Manufacturer: Liteway Inc

Model Number	Description
TTL-1004	TTL unbalanced / balanced converter
PS-1210	Linear Power Supply

This equipment contains no memory (volatile or nonvolatile).

The LuxLink® TTL-1004 is a self-contained unit that will convert an unbalanced DCLS IRIG or a 1 PPS input signal into four differential floating outputs. This is a real time system, there are no memory or buffers in the devices.
